

CONTENTS

Professor Wiesław Szlenk – life and activity	9
M. Bodnar, U. Foryś: A Model of the Immune System with Stimulation Depending on Time	12
P. Boguś: Statistical Physics Methods in Clustering of Medical Images	18
A. L. Dawidowicz, J. L. Zalański: On the System of von Foerster Equations with Nonlinear Boundary Conditions	24
Z. Denkowski, L. Gasiński, S. Migórski: Determination of a Death Rate In Age-Structured Population Dynamics	29
M. Durnaś, B. Grzywacz: The Filtering of Signals for Medical Diagnostics by Application of Differential and Difference Inequalities	35
T. Janas, A. Janiak-Osajca, T. Janas: Topological Analysis of the Division Processes in Cell Biology	41
A. Józwiak, J. Janicki, M. Demczuk: A Multistage NN Type Classifier Based on Class Overall Rate Minimization and Its Application to Cardio-circulatory Events Prediction	47
R. Kalicka: Stochastic Filtration of Biomedical Signals. Kalman Filter.	52
M. Kargol, A. Kargol, A. Markowski, S. Przystański: A Procedure for Separation of Membrane Transport into Passive and Active Components	58
B. Kopociński, T. M. Lachowicz, J. Niedbach: Modeling of Dynamics of Continuous Mixed Cultures	64
T. Kosztolowicz: Diffusion in a Membrane System	70
P. Krężalek, W. Marczewski[†]: Use of Optimization Procedures in Biomechanics	76
T. Lipniacki, H. Zorski: Mechanics of Ramachandran System	82
D. Majchrowska: Stochastic Model for the Phage Reproduction in Bacteria	86
E. Majchrzak, M. Dziewoński: Numerical Simulation of Ice Ball Generation Using the Boundary Element Method	92
A. Marciniak: Diffusion Limit for Genetic Drift	98
I. Mróz, A. Pękalski: Model of Evolving Populations Colonizing a New Environment	104
W. Pasewicz: The Statistical Models for Multiple Birth Discrimination	110
W. Pawłowski: Individual-based Model of Spruce Stand. Basic Principles and Problems	117
Z. Peradziński, B. Kaźmierczak: Solutions to Reaction-Diffusion Equations – Asymptotic Analysis	123
C. Sokolowska, K. Budzińska, A. Józwiak: The k-NN Rule Application For the Evaluation of the Influence of Chemical Stimuli on the Ventilation Parameters Before and After Interruption of Conduction in the Phrenic Nerves	129
A. Stanisław: A Mathematical Model of the Enhanced Immune Response of the Body	133
P. Sypka, M. Ziółko, J. Suliński: Wavelet Analysis of Temperature Variation within Tree Stands	137
J. Szajowski, S. C. Zmonarski, M. Klinger, A. Puziewicz-Zmonarska: Cox Proportional Hazard Regression Model in Prediction of Chronic Renal Failure Progression – Preliminary Study	144
W. Szeligiewicz: Algal Growth and Dominance under Influence of Water Vertical Circulation	151
W. Uracz, R. Wit, F. Krok: A Kinetic Model of the TCR/CD3 Decameric Complexes	157
M. Woźniak, K. Jackowski, M. Kurzyński: Combined and Unified Algorithms for the Medical Decision Problem	162
