

Table of Contents

Simon D. Angus, Monika J. Piotrowska	6
Towards a 3D cellular automaton model of multi-cellular spheroids	6
Marek Bodnar, Urszula Foryś, Zuzanna Szymańska	12
Model of AIDS-related tumour with time delay	12
Wojciech Borkowski	18
Cellular automata model of macroevolution	18
Katarzyna Buszko, Katarzyna Piecyk, Krzysztof Stefański	26
Measuring transient chaos in models of population dynamics	26
Tomasz Burzykowski, Dirk Valkenburg	33
Processing of high-resolution MALDI-TOF mass spectrometry data by using an average isotopic distribution	33
Antoni Leon Dawidowicz, Anna Poskrobko, Jerzy Leszek Zalasinski	39
On the age-dependent predator-prey model	39
Urszula Foryś	45
Spatial effects on interactions between brain tumour and immune system — influence of diffusion	45
Aleksandra Gruca, Andrzej Polański	51
Power functions of statistical tests for detecting significant go terms based on dna microarray data	51
Paweł Jankowski, Dariusz Gozdowski	57
Canonical functional model of spring barley development. Preliminary results	57
Mikhail Kolev	63
Mathematical modelling of the humoral immune response to virus	63
Beata Hat, Krzysztof Puszynski, Tomasz Lipniacki	69
Gene copy number in p53 signaling pathway	69
Artur Jasionowski, Agnieszka Świątek	75
Noise as possible cause of difficulties with determining correlation dimension	75
Bogdan Kazimierczak, Zbigniew Peradzyński	81
Calcium waves with mechano-chemical couplings	81
Anna Marciniak-Czochra, Mariya Ptashnyk	86
Effects of logistic proliferation in the model of cancer invasion	86
Paweł Mitkowski	92
Simulations of Lasota-Ważewska equation	92
Kazimierz Piechór	98
Existence of travelling waves in mechanochemical models of tumour angiogenesis	98
Jan Poleszczuk	104
Tumor development model under angiogenic signaling with dependence on vessel impairment	104
Krystyna Stanisiz-Wallis	110
The analysis of diagnostic variables using logistic regression	110
Dorota Szlefarska, Piotr Boguś	115
Selected aspects of filtered back projection method application in SPECT images reconstruction	115

Jarosław Śmieja	
Spatial model of virus infection and interferon-based immune response	121
Andrzej Świerniak	
Modeling combined antiangiogenic and chemo-therapy	127
Zhivko Velkov, Mikhail Kolev, Alia Tadjer	
Molecular modelling and statistical analysis of scavenging/antioxidant activity of phenolic compounds	134
Volodymir G. Zinkovsky, Olga V. Zhuk	
Estimation of the characteristic residence time and excretion parameters of xenobiotic in case of its multicompartement distribution	140
Mariusz Ziółko, Tomasz Drwięga	
Application of wavelet series to speech analysis	146
Spis autorów	152
