

## TABLE OF CONTENTS

Adam Bobrowski, Radosław Bogucki <b>Degenerate convergence of Feller semigroups with applications to some stochastic genetic models</b> . . . . . Marek Bodnar, Urszula Foryś <b>Modelling of an immune reaction under the influence of interleukin</b> . . . . . Damian Bogdanowicz <b>Analyzing sets of phylogenetic trees obtained from Bayesian MCMC process using topology metrics</b> . . . . . Damian Borys, Katarzyna Szczucka-Borys, Kamil Gorczewski <b>System matrix calculation based on direct measurements for iterative reconstruction algorithms in SPECT</b> . . . . . Dorota Ferguson, Piotr Boguś <b>Selected aspects of iterative reconstruction methods of SPECT images</b> . . . . . Mariusz Frąckiewicz, Henryk Palus <b>KHM clustering technique as segmentation method of endoscopic colour images</b> . . . . . Krzysztof Fujarewicz <b>Planning identification experiments for NF<math>\kappa</math>B signaling pathway</b> . . . . . Aleksandra Gruca, Marek Sikora <b>Evaluation of significance of GO terms included in multi-attribute rules designed for functional description of gene groups</b> . . . . . Witold Jaroszyński, Piotr Boguś <b>Modelling of dielectric properties of human erythrocytes</b> . . . . . Bogdan Kazmierczak, Mark Alber, Richard Gejji <b>Prevention of blow-up by infinite diffusion</b> . . . . . Ekaterina Kutafina, Mariusz Ziółko <b>Modeling of sound propagation in vocal tract</b> . . . . . Urszula Ledzewicz, Heinz Schättler <b>On optimal control for a model of cancer treatment with immunological activity</b> . . . . . Małgorzata Plechawska, Joanna Polańska, Andrzej Polański, Monika Pietrowska, Rafał Tarnawski, Piotr Widłak, Maciej Stobiecki, Łukasz Marczak <b>Application of the gaussian mixture model and the mean spectrum to proteomic MALDI-ToF mass spectra analysis</b> . . . . . Andrzej Polański, Joanna Polańska, Monika Pietrowska, Łukasz Marczak, Michał Marczyk, Maciej Stobiecki, Rafał Tarnawski, Krzysztof Składowski, Piotr Widłak <b>Weighted gaussian mixture model for classification of MALDI-ToF mass spectra</b> . . . . . Jan Poleszczuk <b>Validity of delayed differential equations in biochemical reactions systems</b> . . . . . Jan Poleszczuk, Iwona Skrzypczak <b>Tumour angiogenesis model with variable diffusion coefficient</b> . . . . . Krzysztof Psiuk-Maksymowicz <b>Modelling of a desmoplastic tumour growth</b> . . . . . 	6 13 20 27 34 40 46 53 60 67 71 76 78 82 89 96 102 108

Krzysztof Puszyński	
<b>Crosstalk model of the NF-<math>\kappa</math>B and p53 systems</b>	114
Joanna Skonieczna, Urszula Foryś	
<b>Stability switches for some class of delayed population models</b>	120
Urszula Skwara	
<b>Influence of various stochastic perturbations on symbiosis system</b>	126
Sebastian Student, Krzysztof Fujarewicz	
<b>Multiclass cancer classification and biomarker discovery on microarray data</b>	130
Piotr Szopa, Monika J. Piotrowska	
<b>Population dynamics of heterotrophic and autotrophic organisms in isolated land environment</b>	137
Jarosław Śmieja	
<b>Comparing experimental and simulation data in modelling of signalling pathways</b>	143
Sławomir Świirydowicz	
<b>Modelling of hepatitis C virus dynamics in liver and ribavirin therapy of infection</b>	149
Radosław Wieczorek	
<b>Modelling of plankton. Micro- and macroscopic description</b>	154
Volodymir G. Zinkovsky, Olga V. Zhuk	
<b>The grounds on a new biokinetic integral criterion - average weighted constant of the distribution of xenobiotics between the organs, tissues and blood of the body</b>	158
