

## CONTENTS

<b>Ewa Ignaczak</b> Estimating the probability of curing non-disciplined patients .....	7
<b>Urszula Foryś</b> Time delays in one-stage models for carcinogenesis mutations .....	13
<b>Agnieszka Janiak–Osajca, Zdzisław Pogoda</b> Remarks about geometric invariants of DNA .....	19
<b>Maria Kaczmarek</b> Mid-growth spurt in body height velocity curve .....	25
<b>Maria Łuszczkiewicz, Joanna Rzeszowska–Wolny, Andrzej Polański</b> Modelling damaged cell nucleus using the expectation–maximization algorithm .	31
<b>Grzegorz Harańczyk</b> Iterated function systems and analysis of DNA sequences .....	37
<b>Katarzyna Piecyk, Katarzyna Buszko</b> Lyapunov Exponents in Biomedical Sciences .....	43
<b>Adam Gałuszka, Anita Gałuszka</b> Graph representation of psychosocial factors in chronic somatic diseases .....	49
<b>Joanna Polańska, Andrzej Polański, Damian Borys</b> Bayesian network model for cause — effect relations implied by gene expression profiles .....	55
<b>Marcin Pacholczyk, Andrzej Polański</b> Application of quaternions to docking of small molecular fragments .....	61
<b>Przemysław Biecek</b> A modified Bonferroni correction for strongly correlated test statistics .....	67
<b>Andrzej Świerniak, Jarosław Śmieja, Urszula Ledzewicz, Heinz Schattler</b> Drug resistance and phase specificity of cancer chemotherapy–finite versus infinite dimensional models .....	73
<b>Katarzyna D. Lewandowska, Tadeusz Kosztołowicz</b> Application of the perturbation method to modeling the enamel caries progress .	79
<b>Tadeusz Kosztołowicz, Katarzyna D. Lewandowska</b> Subdiffusion in the formation of carious lesion .....	85
<b>Beata Paszko</b> Waltzing with karyotype asymmetry .....	91
<b>Antoni Leon Dawidowicz, Jerzy Leszek Zalasieński</b> On the mathematical model of morphology of leaves .....	97
<b>INDEX OF AUTHORS</b> .....	101
